Title: 3D Test Data
Prepared by: Adam Skibbe
Date: 2/7/07

Data included
- Sample_Data.zip
  - Konza specific data
    - Boundary shapefile
    - Soils shapefile
    - DEM
  - Regional data
    - Boundary shapefile
    - Soils shapefile
    - DEM
- Test1DEM.zip
  - Old standard DEM file

All of the ArcView data was manipulated in the standard desktop GIS setting and should allow for viewing or editing in any version of this software (ArcView, ArcGIS, etc.). The Test1DEM.zip file includes a DEM that was derived from current DEMs using ArcInfo to, I believe, reflect the old DEM standard.
